

KITCHEN'S CRANE & EQUIPMENT

1997 - 2006 Kasgro Shiftable Depressed Deck Rail Cars

These cars were built with a 45-year lifespan for a major Petro/Chem supplier. They are in good condition and have been used for long/heavy units such as pressure vessels, reactors, heat exchangers, refining columns and industrial gas storage tanks. The decks shift laterally and vertically to improve clearances for exceptionally long/over-dimensional cargoes.

There are two sets available:

2x 2006 Kasgro 12 Axle Shiftable Deck Rail Cars

Unit # 206 & 207

Load Weight: 500,000 lbs.
